WISEdata is the required system districts must use to share data with DPI for state and federal reporting, including Wisconsin School and District Accountability Report Cards and Federal Accountability Report Cards (ESSA).

It is critical to ensure that district data is valid and reliable when it is pulled through various Snapshots conducted across the year (i.e., 3rd Friday, October 1 Child Count) because of the links to state and federal accountability. The WISEdata Service will assist school district personnel in reviewing and understanding the many reports within WISEdata Portal. Participation in this package will increase the understanding and importance of using a uniform process for data collection and entry. Program participants will also be guided to understand how data is reviewed and validated prior to DPI Snapshots and uploads.
