

Service...Above and Beyond

QUICK FACTS:

- **17 of 26 CESA #4 districts currently use SEEDS4Schools®**
- When students transfer in from other SEEDS districts, their data comes with them and does NOT have to be re-entered into the system!
- The system is continuously improved by in-district individuals using it on a daily basis and enhanced by user requests!
- SEEDS is used in 148 Wisconsin school districts. It has spread to districts by staff recommendations. Just ask your SPED staff!

SEEDS4Schools® Support Special Education Electronic Data System Support

Districts choosing SEEDS4Schools® for their Special Education data processing will continue to receive a high level of support in the areas of technical assistance; database administration/support; and enhancement/refresher trainings throughout the school year.

CESA #4 will:

- Provide trainings for new administration/directors, therapy providers, and teachers
- Provide trainings on form updates, system updates, and refreshers as requested
- Provide basic-level troubleshooting for user profiles, data input, formatting, activation, and inactivation of students
- Provide in-district WISEdata portal assistance (approximately 1/2 day)
- Represent districts at quarterly council meetings including an annual forms review
- Provide annual caseload rollover assistance as well as ongoing caseload/enrollment updates throughout the year
 - Maintain all CESA-provided itinerant staff enrollments
- Cover the annual Partner Meeting registration fee for all CESA #4 district administration (director/designee) attendees
- Assist in troubleshooting data interfacing between SEEDS and Kompas Care including, but not limited to, informal auditing such as primary provider verification, service start/end date adjustments, SBS district verification for open enrollments, and other contractual arrangements, and user profile setting verification.

SEEDS4Schools® is a web-based application available to authorized users with any Internet-connected device. Its purpose is to support the generation of forms and collection of information required in the IEP and related processes as well as customized reports, School-Based Services reimbursement, and school district billing. Software membership fees for continuing SEEDS partners are based on a formula using a flat database fee and enrollment calculations.

SEEDS4Schools software will be billed separately via CESA #6.

- SEEDS compiles data for state and federal reports, referral statistics, and monitoring the progress of evaluations
- SEEDS includes validations to assist with self-assessment
- SEEDS permits Special Education staff to develop standardized IEPs and related forms fully compliant with DPI
- SEEDS includes accommodations for all state and local testing/assessments

New consortium partners are encouraged to contact the CESA #4 SEEDS4Schools® Director for details on initial database setup and training!
